Protection and Support for Corn

**CORN WITH SMARTSTAX® TECHNOLOGY**

- **Symbiotic Talc** Technology helps increase availability and uptake of nitrogen, phosphate and potassium. The availability of additional N, P, and K helps increase development of bigger roots which helps increase uptake of moisture and macronutrients to enable better plant growth and increased yield potential.

**CORN WITHOUT SMARTSTAX® TECHNOLOGY**

- **QuickRoots** Technology helps increase availability and uptake of nitrogen, phosphate and potassium. Enhanced early-season disease control due to the fungus, Fusarium, does not cause delayed seedling emergence and seedling under certain cold conditions. QuickRoots Technology helps increase availability and uptake of nitrogen, phosphate and potassium. Enhanced early-season disease control due to the fungus, Fusarium, does not cause delayed seedling emergence and seedling under certain cold conditions.

**BASE OFFERINGS**

**SEAMLESS CORN OFFERINGS**

- **BioRise™ Technology** is a powerful pair of Bio-Enhancers products that complement our lineup of fungicides, insecticides, and nematicides. This offering contains two separate but powerful products — Acceleron® B-300 SAT and Acceleron® B-360 ST.

- Acceleron® B-300 SAT (QuickRoots) releases phosphate brand-in-the-seed corn varieties. It is a powerful pair of Bio-Enhancers products that complement our lineup of fungicides, insecticides, and nematicides. This offering contains two separate but powerful products — Acceleron® B-300 SAT and Acceleron® B-360 ST.
