

THE SYSTEM OF CHOICE

ROUNDUP READY
XTEND
CROP SYSTEM

XTENDFLEX
SOYBEANS

YIELD. WEED CONTROL. FLEXIBILITY

You want high-yielding performance. You also need innovative options for managing tough weeds. XtendFlex[®] soybeans offer proven performance and herbicide tolerance to dicamba, glyphosate and glufosinate. That's what makes the Roundup Ready[®] Xtend Crop System the #1 soybean system planted by farmers in the U.S.*

YIELD

Average 2.5+ bu/A yield advantage over Enlist[®] weed control system when used as part of the Roundup Ready[®] Xtend Crop System¹

TRIPLE TOLERANCE

WEED CONTROL

Triple tolerance allows control of over 335+ weed species²

When used with XtendiMax herbicide with VaporGrip[®] Technology, get up to 14 days of soil activity on certain small-seeded broadleaf weeds³

Here's what farmers are saying...

“ We plan to continue growing XtendFlex soybeans on our operation due to the versatility of the chemical program and the advanced traits.

Brett V., Odessa, MO

“ We like the genetics that come with XtendFlex [soybeans], and it's not all about spray either — it's about yield, and that's what we want.

Larry N., Windom, MN

*Traited U.S. acres

¹ 2021 Farmer Managed Soybean System Trials (67 locations in 2021 reporting data located with 12-IA, 11-IL, 9-IN, 4-KS, 3-MI, 9-MN, 1-ND, 8-NE, 5-OH, 2-PA, 1-SD, 2-WI). Significant at P = 0.05 LSD at 1.2 Bu/A as of 11/29/2021. Roundup Ready[®] Xtend Crop System data = XtendFlex[®] soybeans with a farmer-selected weed control program that may include dicamba, glyphosate and various residual herbicides. Enlist[™] Weed Control System data = Enlist E3[®] soybeans with a farmer-selected weed control program that may include glyphosate, Enlist One[®] herbicide, Liberty[™] 280 SL herbicide and various residual herbicides.

² Based on approved EPA herbicide labels for the herbicides recommended for use in each system as of January 2021.

³ Results may vary, depending on rainfall and soil type. Always use dicamba with residual herbicides in pre-emergence and postemergence applications that have different, effective sites of action, along with other Diversified Weed Management Practices.

Bayer is a member of Excellence Through Stewardship[®] (ETS). Bayer products are commercialized in accordance with ETS Product Launch Stewardship Guidance, and in compliance with Bayer's Policy for Commercialization of Biotechnology-Derived Plant Products in Commodity Crops. Commercialized products have been approved for import into key export markets with functioning regulatory systems. Any crop or material produced from this product can only be exported to, or used, processed or sold in countries where all necessary regulatory approvals have been granted. It is a violation of national and international law to move material containing biotech traits across boundaries into nations where import is not permitted. Growers should talk to their grain

handler or product purchaser to confirm their buying position for this product. Excellence Through Stewardship[®] is a registered trademark of Excellence Through Stewardship. XtendiMax[®] herbicide with VaporGrip[®] Technology is part of the Roundup Ready[®] Xtend Crop System, is a restricted use pesticide and must be used with VaporGrip[®] Xtra Agent (or an equivalent vapor reducing agent). For approved tank-mix products (including VRAs and DRAs), nozzles and other important label information visit XtendiMaxApplicationRequirements.com.

ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS. It is a violation of federal and state law to use any pesticide product other than in accordance with its labeling. NOT ALL formulations of dicamba, glyphosate or glufosinate are approved for in-crop use with products with XtendFlex[®] Technology. ONLY USE FORMULATIONS THAT ARE SPECIFICALLY LABELED FOR SUCH USES AND APPROVED FOR SUCH USE IN THE STATE OF APPLICATION. Contact the U.S. EPA and your state pesticide regulatory agency with any questions about the approval status of dicamba herbicide products for in-crop use with Roundup Ready 2 Xtend[®] soybeans or products with XtendFlex[®] Technology. Products with XtendFlex[®] Technology contains genes that confer tolerance to glyphosate, glufosinate and dicamba. Glyphosate will kill crops that are not tolerant to glyphosate. Dicamba will kill crops that are not tolerant to dicamba. Glufosinate will kill crops that are not tolerant to glufosinate. Contact your seed brand dealer or refer to the Bayer Technology Use Guide for recommended weed control programs.
